- **Schools & colleges**
- **Transit stations - rail, bus, ferry, airports**

Client Reviews

I first engaged John for a large mixed-use student housing development in southern California. John created a bicycle and pedestrian circulation plan that impressed planning staff, planning commissioners and city councilmembers alike. He then designed our onsite bicycle accommodation facilities and helped my firm select each and every individual bicycle facility component for installation. I've since engaged John for development projects nationwide, and he never ceases to impress me and the municipal stakeholders who approve my development projects. He not only knows "all things bicycle", but he's actually a thoughtful and sophisticated designer and planner who helps me think through all aspects of the bicyclist, pedestrian and motorist experience of the communities I develop. I recommend him to everyone I can.

Student housing, multifamily and senior housing developer
Dallas, TX

I have used the consulting services of owner John Ciccarelli's Bicycle Solutions on a number of properties I have managed, and have found his services to be highly professional and comprehensive – from conceptual proposals, to presentations before owners and Boards, to installation of bike racks, Bicycle Solutions is the contractor of choice for bike parking projects. I fully endorse and recommend the excellent services provided by John's firm.

Mark A. Moreno
Sr. Portfolio Property Manager, CCAM
CitiScape Property Management Group, LLC
San Francisco, CA

Laurence Management has worked with John Ciccarelli for years when we needed help with the installation of bicycle racks at a number of the properties we've managed. John's knowledge and service have been exceptional, from coming up with workable solutions in various designs and layouts to assembly and installation. He has also been instrumental in the timely and thorough coordination of product shipping and delivery. John is a pleasure to work with and is highly recommended for any bicycle storage needs.

Adele Laurence, Owner

Several years ago our Association hired John to design and install some bike [parking] in our historic condo building. It was a challenge to find places for the racks, but John did a thorough walk-through with me of the entire development to find the right spots. He had some novel ideas for how we could increase our capacity. He installed the racks and provided us with a good contractor for installing future racks. Our Management company was so impressed with his work that they sought his advice for another of their clients. I would definitely recommend John for any bicycle-related project. He has many years of experience and knowledge in all things bicycle-related. His professionalism is unmatched.

Aida Berkovitz, former President, Board of Directors
Clocktower Lofts
San Francisco, CA

Our Association had John plan, price and install our bike room, which had been a mess for years. He did a great job. Today, more than five years since we went through this process, our bike room is still in good order and we have a waiting list of residents wanting to use it. All around a good experience and a good result.

Sandra Rendell, HOA Board Member
Southern California
